

## Balancing machines

### Characteristics:

- Rotor balancing
- Balancing inboard and outboard rotors of various designs and types (rotors of electric motors, turbines)
- Balancing of parts that do not have their own bearing surfaces (disks, fans, pumps) on special mandrels
- Rotor balancing on their own bearings
- Drive shaft or belt shaft drive type
- Energy recuperation during rotor braking
- Spindle drive from a squirrel cage induction motor
- Electric motor power supply from a frequency converter
- Applied digital indicator devices
