

### **Automated installations for shafts surfacing**

The surfacing allows you to restore physically worn and deformed surfaces of the shafts, returning them to their original dimensions, as well as significantly increasing their strength and corrosion resistance, significantly extend the operation life of the shafts. Surfacing is performed on special automated welding installations using wire as a surfacing material.

#### **Advantages of automatic shafts:**

- High shafts surfacing quality
- High productivity
- Economy of electrode wire and electricity
- Possibility of surfacing tapered surfaces
